**MYITEDU, LLC** Brooklyn, NY 11234

Jan 2020 - Present

**Senior Lead Software Engineer**

My primary responsibility is to build and maintain innovative and modern web applications using web development tools. Also build and test reusable and efficient PHP modules and write secure modular codes, designing and maintaining databases and perform backend and User Interface tests on applications to optimize performance, collaborate and work with other developers in the company to fill data acquisition requirements.

Other responsibilities are to check that the HTML, shared JavaScript and CSS across applications is consistent and valid. Document the entire process and plan. Anticipate any changes during development. Follow new industry trends and best practices in web development. Convey the progress of the technical process to the project manager. Test, troubleshoot and debug web applications

**IBM**

June 2009 – June 2012

 700 Locust St, Dubuque, IA 52001**Mainframe Storage Administrator**

As a Mainframe Storage Administrator, my responsibilities included managing database and storage in Mainframe/OS, including backup tapes, DASD, and maintaining backup jobs. I used JCL, CA1, DFHSM, SMS, and JES, and supported over 40 IBM clients. My team was responsible for ensuring that service requests, incident, and change tickets were assigned to the technicians according to their skill sets. We also updated security and HIPAA compliance documents, attended client meetings, and monitored ticketing systems, such as Maximo 7, Remedy, ISM, IBM internal products, Tivoli, SAN, DB2 database storage KPI, and Oracle 10-11g storage capacity control. The IBM GDF model, along with Lean methodologies, was widely used in our team

**PMX Industries, Inc**

Apr 2008 – June 2009

 5300 Willow Creek Dr SW, Cedar Rapids, IA 52404**PHP Web Developer**

Developed database driven web applications for a varied internal customer base in PHP 4 and 5. Products include discussion boards, news, newsletter, email list manager, biography management, document library, plus many more. Technologies used were Windows Server, LAMP, MS SQL, Cold Fusion, Microsoft SharePoint, ASP 3.0 and PHP. Successfully completed ISO required courses and Safety and Hazards courses. Collected the data from Different connector and interconnect applications with specific physical and mechanical properties. PMX has been successful in customizing alloys to meet demanding cost or performance requirements. Most of the projects were completed by following the Agile principles.
